# Office Action Summary

Application No.

09/479,653

Applicant(s)

WADA ET AL.

Examiner

Jamie Vent

Art Unit

2616

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 20 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 22-29 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 22-29 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments filed February 1, 2005 have been fully considered but they are not persuasive.

On page 8-12 applicant argues that Sequilla et al fails to teach, suggest or disclose the following limitation: "an image capturing apparatus using a wireless communication unit wherein the image capture apparatus comprises: a control unit to judge whether or not the digital image recorded on the recording medium is already recorded" as disclosed in Claims 22 and 25. It is seen in Figure 2 that the camera communicates with the server through a wireless communication link as further described in Column 5 Lines 64-67. Furthermore, it is described in Column 6 Lines 20-50 that a control unit within the server determines what pictures have been recorded from those received from the user and thereby meeting the limitation. Although, all of applicants points are understood the examiner can not agree and therefore the rejection is maintained.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2616

Claims 22-33 are rejected under 35 U.S.C.102(e) as being anticipated by Squilla et al (US 6,396,537).

**[claims 22, 23, 25, 26, 30, 31, 32, and 33]**

In regard to Claims 22, 23, 25, 26, 30, 31, 32, and 33, Squilla et al discloses an image capture apparatus that communicates with an external recording apparatus using a wireless communication unit, the image capture apparatus (Figure 2 shows the communication between each system which can occur wirelessly) comprising:

- image capture unit adapted to capture a digital image (Figure 2 shows an image capturing system which comprises a digital camera 24 which acts as a capturing unit as described in Column 4 Lines 3-44);
- recording unit adapted to record the digital image captured by the image capture unit on a recording medium (Figure 2 the image is recorded onto the memory 48 for temporary storage before transmission to permanent storage in a memory of a computer, a CD, printed pictures, etc, as described in Column 5 Lines 5-17);
- a control unit adapted to judge whether or not the digital image recorded on the recording medium is already recorded in the external recording apparatus (Figure 2 shows the control units 83 and 76 which judge which digital images have been recorded);
- wherein said control unit automatically transmits the digital image recorded on the recording medium to the external recording apparatus if it is said judged that the digital image recorded on the recording medium is not already recorded in the external recording apparatus (Figure 2 further shows the transmission of the image through the desired medium when it is determined that the digital image needs to be recorded);

- wherein the control unit avoids transmitting the digital image recorded on the recording medium to the external recording apparatus if it is judged that the digital image recorded on the recording medium is already recorded in the external recording apparatus (Column 6 Lines 20-50 describes the control unit avoiding transmission if it is judged that the image has been previously recorded);
- image capture apparatus has an operation mode of automatically transmitting a digital image which is not recorded in the recording apparatus to the recording apparatus and determining whether or not to avoid reproducing a digital image which is already recorded in the recording apparatus from the recording medium (Column 4 Lines 16+ transmitting of images and Column 4 Lines 55 automatically transmitting of images from camera to the CPU while camera is in the communicating range of the image spot and as further seen in Figure 4 it is determined if the content is desired and further determining whether or not to record the image as stated in Column 8 Lines 39-56);
- image capture apparatus communicates with a recording apparatus using a wireless communication unit (Figure 2 element 20 and 82 allows wireless communication between the camera 24, CPU 10, and server 70); and
- Determining whether or not to avoid reproducing a digital image which is already recorded in the recording apparatus from the recording medium (Figure 6 shows the operation mode of recording unit when the pictures are received in step 140 (film for cameras are dropped off or are previously transmitted via wireless transmission) the film processor connects to the image server which judges whether to skip or delete a reproduction if the picture does not fit the desired

content from the personality file, step 144 or 150. Another operation ode step 146 also provides the user the opportunity to decide whether the pictures are to be deleted or skipped before purchasing by comparison of pictures taken with database needs as further described in Column 8 Lines 1-56).

**[claims 24, 27, 28, 29]**

In regard to Claims 24, 27, 28, and 29, Squilla et al discloses the image communication apparatus includes a camera (Figure 1 Element 24 and further described in Column 4 Line 4).

### **Conclusion**

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

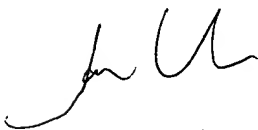

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

**Contact Information**

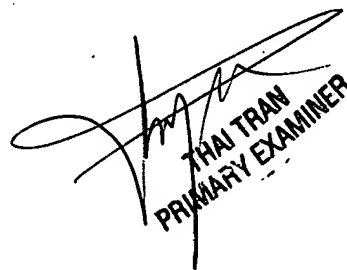

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jamie Vent whose telephone number is 571-272-7384. The examiner can normally be reached on 7:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on 571-272-7950. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
